Professional Summary

Python developer and AI/ML engineer with 3 industry internships and 3 live production applications. Builds AI-powered automation systems (Gemini API, RAG, LangChain) and data-driven applications — one deployed system cut manual scheduling effort by 98%. Strong foundation in full-stack development (React, Node.js) and data analytics (Power BI, SQL, Pandas). Consistently ships tested, production-grade systems with measurable business impact.

Education

GSFC University, Vadodara, Gujarat

2023 – 2027

B.Tech in Computer Science & Engineering

CGPA: 6.2/10

- Relevant Coursework: DSA, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering, Machine Learning, Cloud Computing

Experience

AI/ML Engineer Intern – Deepak Chem Tech Ltd. (Deepak Nitrite Group)

Jun – Jul 2026

Vadodara, GJ

- Achieved a **98% reduction** in scheduling time (3–4 hrs → under 2 min) by engineering an AI-powered Gantt Chart & Utility Automation System in Python/Streamlit for real-time batch scheduling.
- Designed a schema-agnostic AI parsing layer using **Gemini API**, eliminating hardcoded Excel mappings and cutting engineering rework by an estimated 90%; delivered 58 unit tests across 9 modules via TDD.

Full Stack Developer Intern – Foecht

Oct – Dec 2025

On-site

- Reduced UI development time by **30%** by architecting a reusable React.js component library adopted across 3+ product modules, improving design consistency company-wide.
- Implemented Node.js REST API endpoints with JWT authentication and centralized error-handling middleware; drove end-to-end feature delivery using structured Git branching and CI/CD practices.

Frontend Developer Intern – AppStoneLab

Dec 2024 – Jan 2025

Surat, GJ

- Delivered responsive React.js UI components for a client-facing web app, ensuring consistent cross-browser and mobile compatibility.
- Standardized frontend-backend request/response contracts, reducing data-mismatch bugs during Node.js API integration and enabling on-time feature releases across sprint cycles.

Key Projects

CareerNavigator | React · Node.js · Supabase · Gemini AI · Tailwind

[Live](#) | [GitHub](#)

- Integrated Google Gemini AI for personalized career guidance, skill-gap analysis, and AI-generated resume bullets across 18+ career fields, serving real production users.
- Shipped full-stack platform with 6+ feature modules (job tracker, skill-gap analyzer, resume builder) on Vercel; architected RESTful backend with JWT auth, rate limiting, and CORS on Railway.

Smart Money Intelligence | Python · Pandas · Scikit-learn · Streamlit

[Live](#) | [GitHub](#)

- Built and trained ML classification models on NSE/BSE market data to detect institutional trading patterns, achieving **87% accuracy** across 15+ engineered features.
- Built end-to-end reproducible ML pipeline (collection → preprocessing → feature engineering → training); launched a 4-page Streamlit dashboard validated by 18+ tests.

Technical Skills

Languages: Python, SQL, JavaScript, TypeScript, HTML5, CSS3

AI/LLM: Gemini API, LangChain, LangGraph, RAG (ChromaDB), Prompt Engineering, AI Agents, OpenAI API

Data & ML: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn, Statistical Analysis, Feature Engineering

Backend & APIs: FastAPI, Node.js, Express.js, REST API Design, Pydantic, JWT, OAuth2, Microservices

BI & Reporting: Power BI, DAX, Power Query, Tableau, Advanced Excel

Databases: PostgreSQL, MySQL, SQLite, MongoDB, Supabase, ChromaDB, Redis

Cloud & DevOps: Git, GitHub, Docker, CI/CD, Vercel, Railway, Streamlit Cloud, Linux, Postman

Frontend: React.js, Tailwind CSS, Zustand, Context API

Certifications

- Microsoft Power BI Data Analyst Professional Certificate — Microsoft / Coursera (Jul 2026)
- Cloud Computing — NPTEL / SWAYAM, Ministry of Education (Nov 2025)
- Introduction to Generative AI — Google Cloud & SkillUp (Dec 2025)
- AI Fundamentals with IBM SkillsBuild — Cisco Networking Academy / GSFC University (Apr 2025)
- Python Essentials 2 — Cisco Networking Academy (Nov 2024)
